THE 1962 ANNUAL RING

Louisiana State University

School of Forestry and Wildlife Management

Baton Rouge, Louisiana

Volume 22

Foreword

FOREWORD

Throughout the years the L. S. U. Society of Foresters has sponsored an annual publication to record the events which occurred around the school during the previous year and to aid in keeping the L. S. U. forestry alumni informed on the school's and of their fellow alumni's progress.

We, the staff, have taken great pride in publishing the Annual Ring and wish to express our greatest appreciation for the aid given us, and especially for the support given us by our advertisers.

Printed with sincere hopes that this volume has continued to serve its purpose and to satisfy the expectations of its subscribers, we proudly present Volume Twenty-Two, the 1962 ANNUAL RING.

Dedication

THOMAS HANSBROUGH

B.S.F., Louisiana State University, 1949

M.F., Louisiana State University, 1957

Ph.D., Louisiana State University, 1961

The 1962 Annual Ring Staff takes great pleasure in dedicating this edition to Dr. Thomas Hansbrough who has devoted much time and effort to the interest of the School of Forestry, and to the welfare of its students.

A native of Greenfield, Tennessee, Dr. Hansbrough first came to L.S.U. in February of 1946 after serving with the Marine Aviators in World War II, and obtained a B.S. in forestry in June, 1949. After graduation he and his wife moved to Homer, Louisiana, to carry on work at the L.S.U. research station there. In 1952 he was recalled to military service and in 1954 spent nine months overseas. In 1955 he returned to Homer, and the following year came back to L.S.U. to work on his M.F. He finished his thesis in Homer and received his M.F. in 1957. After two more years at the research station, he came back to L.S.U. once more, to work on his Doctorate, which he received in August of 1961. Presently, Dr. and Mrs. Hansbrough reside here in Baton Rouge with their two children Tommy and Faith.

Dr. Hansbrough is a faculty advisor for the L.S.U. Society of Foresters, in which he is a conscientious worker for better relations between the faculty and the students, and a good friend to anyone who has had the opportunity to become associated with him. It is with great appreciation, that we dedicate this volume to him.

The Director's Message

by DR. PAUL Y. BURNS

Director of the School
of Forestry and Wildlife
Management

B.S., Tulsa, 1941
M.F., Yale, 1946
Ph.D., Yale, 1949

To: Annual Ring Editor Eddie Ahrens

The Director's Message

by Paul Y. Burns

Director of the School of Forestry and Wildlife Management

Perhaps the most widely discussed topic in forestry education circles this year is the five-year curriculum. At the time of this writing, forestry faculties are studying the rough draft of the recommendations contained in the Dana Report, *Education in Forestry-Today and Tomorrow*. Dr. Dana, Dean Emeritus of the School of Forestry at the University of Michigan, has been commissioned by the Society of American Foresters to prepare a comprehensive report on American forestry education. Dr. Dana feels that five years (160 weeks) of college work is the minimum necessary for the education of a professional forester. He recommends that the following non-forestry subjects should be required for the curriculum: written and oral communication, botany, zoology, inorganic and organic chemistry, physics, trigonometry, college algebra, physical geology, soils, surveying, economics, and American government. He suggests that the forestry subjects indispensable for every forester are: dendrology, forest ecology, principles of silviculture, forest protection, forest measurements, forest management, forest economics, forest policy, and forest administration.

Dr. Dana's aim is to produce men who possess both culture and expert knowledge in forestry. He feels that the distinguishing characteristic of forestry is its concern with management of forest lands, and that the forester is basically a practitioner whose unique professional competence lies in his ability to utilize the sciences and the humanities in the management of forest land for the attainment of specific objectives.

During the next year and probably longer, the faculty of our School and many other foresters will be discussing the findings and recommendations of the Dana Report. Comments from our alumni will be welcomed. Standards of forestry education need to be raised if the profession makes the contribution it should to the development of sound forest policies and practices.

MISS EVELYN MOREAU

A Memorial to Gloria Hernandez

The faculty, staff and students were shocked at the death on Friday, December 1, 1961, of Mrs. Gloria Hernandez, a secretary at the Forestry School since February 1, 1961.

Everyone who knew her loved her wit and companionship, her ability and self-reliance, her friendship and interest in everything connected with the School. A dedicated worker, a true friend, and a constant aid to the students, Gloria will be long remembered by the forestry faculty and student body.

The Pinettes is an organization composed of wives of Forestry students and professors at L. S. U. The organization serves to promote friendship and fellowship among the foresters' wives and offers programs and activities of interest to the members.

The monthly meetings offer opportunities for the wives to become better acquainted with and to participate in programs of varied topics which they choose.

The organization was founded in 1955 by Mrs. Paul Burns, who now serves as co-sponsor with Mrs. Robert Muncy.

Highlighting the Pinettes' social calendar are an annual Christmas Party and an annual Spring Picnic for the Pinettes, their husbands, and faculty members.

Xi Sigma Pi is the oldest national forestry honor fraternity in the United States. The local chapter, Nu, was established on April 13, 1940.

The objectives of Xi Sigma Pi are to secure and maintain a high standard of scholarship in forestry education, to work for the upbuilding of forestry and to promote fraternal relations among earnest workers engaged in forestry activities.

Xi Sigma Pi projects are the presentation of the Outstanding Sophomore award in forestry each year, and maintenance of forestry alumni distribution map in the lobby of the Forestry Building.

Only forestry students of high scholastic ranking and showing promise of attaining high professional achievement are elected to membership in the fraternity.

The L. S. U. Society of Foresters has continued to be the top club in the College of Agriculture. It is an organization which is dedicated to the promotion of friendship and the development of interest in the profession of forestry.

The society plays an active role in student life by sponsoring the ANNUAL RING, Freshman Council Fire, Field Day, Annual Conclave Trip and Spring Party. Members of the society also contribute time and labor to cut one acre each year at the demonstration forest on the School Forest.

Regular meetings are held on the first and third Wednesday of each month with a speaker or film being the major part of the program. This year, slides shown by the forestry students of their summer jobs have proved interesting.

"Wildcat up a Tree" was the theme which won a trophy for the society during Homecoming. This year we hope to improve our conclave showing by setting up a practice area in back of the Forestry Building.

Summer Camp

Summer Camp is an eight week series of applied courses in forestry usually taken between the Junior and Senior years. The camp is located in Lee Memorial Forest, about midway between Bogalusa and Franklinton, La.

This year's camp was characterized by the familiar "cut and leave" tests, "suds" at Capo's, rain and mud, yellow jackets, poison sumac, afternoon softball games, planned visits, long hours at the calculators, late night water fights, and mysterious voices from the woods.

More harsh words

Summer Camp

The Forest Camp at Bogaloose
Is cold and wet and drear-
The boys go out surveying things,
They do this every year.

A Forest Camp the place is called,
But nudist t'will become-
The boys wear scarcely any clothes,
And those they wear are burn.

When evening falls, the poker chips
Are heard on every hand,
And angry voices loudly rise,
"Pay up!" is their demand.

They're supposed to learn of this and
that,
And how to climb a tree-
And all about these Forest things
For a nice B. S. F. degree.

Much midnight oil, the poor boys
burn,
And very long their days-
They try so very hard
To please Prof Vaux and Hayes.

-Taken from ANNUAL RING, 1938 from
a visiting Professor's Wife.

Homecoming

Our theme this year was "Wildcat Up a Tree." The display placed 2nd in the miscellaneous division. The Tigers rolled over Kentucky, 24 to 14 and homecoming was a great success.

Spring Conclave

The Fourth Annual Conclave of Southern Forestry Schools was held at Camp Blanding near Kingsley, Florida, on April 7, 1961.

Twenty representatives left L.S.U. on April 6th at 7:00 A.M. After a long hard day, the weary reforesters arrived at Camp Blanding at 10:00 P.M. that night. Everyone that could, slept between two mattresses because no one brought any blankets, and it was cold, brrr.

After a little shut-eye, the troops arose to go feed their faces. The events started at 8:00 A.M. As the day wore on, the L.S.U. delegation had many near point winners, but nobody came through until "Big-Daddy" broke the ice. After dinner, the "sure winners" passed out after a hard saw. "One-Eye" finished first in log chopping and "Pono" came in 2nd after the d.b.h. estimation.

That night monetary prizes were awarded to the winners. The conclave speaker was Dr. Kaufman, Director of the University of Fla. School of Forestry. Arkansas A&M was chosen host for the 5th Conclave.

Today's Forester

Building the Future

Unlike his predecessor in the woods, whose job began and ended with "fighting fire and logging the mill," today's industrial forester is a man of many responsibilities and a manager in the truest sense of the word.

In addition to planting, growing, protecting and harvesting continuous crops of trees over vast areas, the modern forester is also charged with the purchase and sale of land and timber, labor relations, wildlife management and the development of recreational sites.

As an expert in the wise utilization of our natural resources, he is often called upon to share this knowledge with others. The time he spends in the public interest, promoting conservation and good forest management, helps build a brighter future and a better standard of living for us all.

That he performs so many tasks so well is a tribute to the forestry schools of the nation, and to the caliber of man attracted by the challenge of growing trees for a growing America. We are proud to have more than 300 such men managing our southern woodlands.

INTERNATIONAL PAPER

Southern Kraft Division

SENTELL, N. WESLEY - Assistant Woodlands Mgr.,
Tenn. River Pulp and Paper Co., Counce,
Tenn.; Married, 4 children.

OPPORTUNITY UNLIMITED THROUGH FOREST PRODUCTS RESEARCH

We salute research foresters who have succeeded in devising improved methods for planting, managing, protecting, and harvesting tree crops. Perhaps the most significant accomplishment since Dr. C. A. Schenck founded the first forestry school at Biltmore in 1898 was the break-through which brought about direct seeding of Southern pines.

The most promising challenge and opportunity in Louisiana and in the South is forest products research aimed at finding new uses, new markets, and complete utilization of our abundant forest resources.

Foresters believe that opportunities in the field of forest products research can bring about the greatest agricultural revolution in the South since the invention of the cotton gin by Eli Whitney in 1793.

THE AMERICAN SPIRIT --
OUR RICHEST RESOURCE

Despite our vast natural resources, America wouldn't be the great country it is today without the AMERICAN SPIRIT. The ambition, self-reliance, and energy of a free people are the reasons why individuals--and industries--grow from small beginnings.

Take Louisiana Power & Light Company, for example. A few far-sighted men organized the Company, and other people of faith and vision risked their savings to make it go. Other folks combined skill and hard labor to bring the benefits of electric living to more and more people. That's the American way of progress--vision, hard work, and business management.

Forestry...

the career with unlimited future

There is a great demand NOW for men trained in the conservation and utilization of the nation's forests and forest products. The demand will be even greater in the years ahead as new and wider uses for wood and wood fiber are developed. A career in Forestry is a positive approach to a successful future.

Manufacturing Southern Pine and
Hardwoods

TREMONT LUMBER COMPANY

Joyce, Louisiana

RESEARCH FINDS A NEW CROP

Research conducted by our foresters and papermakers has made bottomland hardwoods a new cash crop for land owners.

Cottonwood, hackberry, and box elder are being used in our mill for the manufacture of high quality coated printing papers.

Our research teams are constantly seeking new methods, new processes and new sources of raw materials.

BUCKEYE

ALWAYS AIMS HIGH
FOREST IMPROVEMENT IS OUR GOAL

Today's best is not good enough for tomorrow at Buckeye. As a market pulp producer, our future is based on continued leadership in forest management.

Throughout the Buckeye organization you see men dedicated to the development of superior industrial forests. These men are the research foresters seeking faster growing trees with special pulp characteristics--and the land management foresters ever interested in better methods of establishing and maintaining forests of high productivity.

Only through these basic high aims in the forests will we continue to furnish more versatile pulps for the expanding numbers of modern products made from cellulose.

Mr. and Mrs. John F. Young and Fly. reside at 1729 Lark Street, New Orleans, La. Mr. Young is a graduate of the class of 1942.

John F. Cole, 1961 recipient of the Seedling and Sapling Award, is presently enrolled in graduate study at Yale University.

Foresters' Code of Ethics

Adopted November 12, 1948

The purpose of these canons is to formulate guiding principles of professional conduct for a forester in his relations with other foresters, with his employers, and with the public. The observance of these canons secures decent and honorable professional and human relationships, establishes enduring mutual confidence and respect, and enables the profession to give it maximum service.

PROFESSIONAL LIFE

1. The professional forester will utilize his knowledge and skill for the benefit of society. He will cooperate in extending the effectiveness of the forestry profession by interchanging information and experience with other foresters, and by contributing to the work of forestry societies, associations, schools, and publications.

2. He will advertise only in a dignified manner, setting forth in truthful and factual statements the services he is prepared to render for his prospective clients and for the public.

RELATIONS WITH THE PUBLIC

3. He will strive for correct and increasing knowledge of forestry and the dissemination of this knowledge, and will discourage and condemn the spreading of untrue, unfair, and exaggerated statements concerning forestry.

4. He will not issue statements, criticism, or arguments on matters connected with public forestry policies, without indicating, at the same time, on whose behalf he is acting.

5. When serving as an expert witness on forestry matters, in a public or private fact finding proceeding, he will base his testimony on adequate knowledge of the subject matter, and render his opinion on his own honest convictions.

6. He will refrain from expressing publicly an opinion on a technical subject unless he is informed as to the facts relating thereto, and will not distort or withhold data of a substantial or other nature for the purpose of substantiating a point of view.

RELATIONS WITH CLIENTS, PRINCIPALS, AND EMPLOYERS

7. He will be loyal to his client or to the organization in which he is employed and will faithfully perform his work and assignments.

8. He will present clearly the consequences to be expected from deviations proposed if his professional forestry judgment is overruled by nontechnical authority in cases where he is responsible for the technical adequacy of forestry or related work.

9. He will not voluntarily disclose information concerning the business affairs of his employers, principals, or clients, which they desire to keep confidential, unless express permission is first obtained.

10. He will not, without the full knowledge and consent of his client or employer, have an interest in any business which may influence his judgment in regard to the work for which he is engaged.

11. He will not, for the same service, accept compensation of any kind, other than from his client, principal, or employer, without full disclosure, knowledge, and consent of all parties concerned.

12. He will engage, or advise his client or employer to engage, other experts and specialists in forestry and related fields whenever the client's or employer's interests would be best served by such actions, and will cooperate freely with them in their work.

RELATIONS WITH PROFESSIONAL FORESTERS

13. He will at all times strive to protect the forestry profession collectively and individually from misrepresentation and misunderstanding.

14. He will aid in safeguarding the profession against the admission to its ranks, of persons unqualified because of lack of good moral character or of adequate training.

15. In writing or in speech he will be scrupulous to give full credit to others, in so far as his knowledge goes, for procedures and methods devised or discovered and ideas advanced or aid given.

16. He will not intentionally and without just cause, directly or indirectly, injure the reputation or business of another forester.

17. If he has substantial and convincing evidence of unprofessional conduct of a forester, he will present the information to the proper authority for action.

18. He will not compete with another forester on the basis of charges for work by underbidding through reduction of his quoted fee after being informed of the fee quoted by a competitor.

19. He will not use the advantages of a salaried position to compete unfairly with another forester.

20. He will not attempt to supplant another forester in a particular employment, after becoming aware that the latter has been definitely engaged.

21. He will not review the work of another forester, for the latter's employer, without the other's knowledge, unless the latter's connection with the work has been terminated.

22. He will base all letters of reference or oral recommendation on a fair and unbiased evaluation of the party concerned.

23. To the best of his ability he will support, work for, and adhere to the principles of the merit system of employment.

24. He will not participate in soliciting or collecting financial contributions from subordinates or employees for political purposes.

25. He will uphold the principle of appropriate and adequate compensation for those engaged in forestry work, including those in subordinate positions, as being in the public interest and maintaining the standards of the profession.
