ACKNOWLEDGMENTS

I would like to give honor and thanks to God, who is the head of my life. I would like to thank my parents for always being supportive and encouraging me to never give up. I would like to thank my professor and mentor, Dr. Dinos Constantinides for guiding me through this journey towards achieving my goals. I would also like to thank all committee members, Professor Michael Gurt and Dr. Alison McFarland for their help and encouragement throughout my Graduate career. Also, I would like to acknowledge the hard work and efforts of Dr. Lori Bade for her knowledge and guidance throughout the academic process. The School of Music at Louisiana State University is one of a kind, and I am truly thankful for my experience here.

ABSTRACT

The idea behind *The Character Studies of Time: A Two Movement Work for Orchestra* should be reminiscent of, and is inspired by the character pieces of Robert Schumann’s *Carnival*. Although the works of Robert Schumann are originally short piano solos, the spirit of the character piece and all that it entails could be found throughout *The Character Studies of Time*. This symphony does not follow a strict form of 19th century writing, although the elements of romanticism can be found throughout the piece. The “characters” as they relate to time are quite literally “night” and “day.” The individual titles are deliberate, as their purpose is to make fun of actual people. In other words, there is a comedic edge that is depicted throughout the symphony. One defining trait of the comedic appearances are the glissandos that are played in a downward motion.

“The Night Owl Hoots” is a character depiction of one who simply “drags their feet” throughout the morning. The piece begins in unison with a mixture of heavy dynamics, which signifies the dread of getting up in the morning. From this point, the main theme echoed in the flutes and clarinets are supposed to imitate an owl, which is typically heard throughout the night. It is to be played with a smugness and sense of laziness in mind. The piece is in no set form, but ends in a major key, which signifies that the character has made it to the night, where they are most alive in their natural habitat.

“The Early Bird,” is particularly more upbeat than its predecessor. The flutes, once again, have the theme. However, the flutes imitate the sound of birds. This is reminiscent of Messiaen’s various birdsongs used in some of his works. Unlike the first movement, the second movement changes tempo and time signature. This is to symbolize a person’s reaction to
midday. Eventually, the return of the original tempo and time signature symbolizes to suggest that the “early bird” has returned.
