■ ACKNOWLEDGMENTS

The synthesis and structural characterization portion of this work was supported by the National Science Foundation (NSF) Career Award DMR-1237550. C.U. and P.F.P.P. gratefully acknowledge financial support for electrical conductivity, Hall effect, and magnetic measurements from the Department of Energy, Office of Basic Energy Sciences, under Award No. DE-SC-0008574. D.P.Y. acknowledges support for heat capacity and magnetoresistance measurements from the NSF under grant no. DMR-1306392. Magnetic data were recorded on a SQUID magnetometer at the University of Michigan purchased using an MRI grant from the NSF (CHE-104008).
