

Mathematics library news 7 November 2010

Please send me your requests for book purchases for the library. Requests are the only way your mathematics librarian can be certain that he is buying what is needed for research.

LSU Libraries has some dedicated endowment funds for book purchases. Book purchasing decisions are based on requests and on analysis of research by the Mathematics and Experimental Statistics Departments. LSU Libraries continues its commitment to access to Springer, Elsevier, and Wiley databases, including journals and Springer electronic books.

Requested books now on order

- Introduction to the Mathematical Theory of Control, by Alberto Bressan
- Low-Dimensional Geometry: From Euclidean Surfaces to Hyperbolic Knots, by Francis Bonahon
- Lectures on Quantum Mechanics for Mathematics Students, by Ludwig Dmitrievich Faddeev
- Lectures on $sl_2(\mathbb{C})$ Modules, by Volodymyr Mazorchuk
- Method of Algebraic Geometry in Control Theory: Part I: Scalar Linear Systems and Affine Algebraic Geometry, and Part II: Multivariable Linear Systems and Projective Algebraic Geometry, by Peter Falb

Most-cited Statistics Articles, 1981-2010
